

CAST Advance Certification for AIP Super Operator (CAC)

Customers who are certified on CAST Application Intelligence Platform (CAST AIP) have increased software quality and achieved a quantum leap advance in productivity

Overview

The CAST Certification recognizes demonstrated competence in leading and directing software analysis and measurement using CAST Application Intelligence Platform (CAST AIP). This certification program is for CAST **AIP Super Operator**, which is an expert role who has a thorough understanding of AIP and technologies for which AIP is being used for, and knowledge of related configuration in AIP.

The CAST Certification recognizes demonstrated competence in leading and directing software analysis and measurement using CAST AIP through Console version 1.2x.

A Minimum passing mark of **80%** for the entire certification is required to achieve the certificate. Only **one attempt** is permitted for this certification.

Prerequisites

Following are the prerequisites for taking up the certification test:

1. Successful completion of CAST Professional Certification for Super Operators (CPC).
2. Successful completion of AIP Super Operator 103-Advance configurations in AIP
3. Successful completion of AIP Console - Architecture Studio v1 course
4. Have thorough understanding of -
 - [Advance Onboarding through AIP Console](#)
 - [CAST AIP Extensions and technologies](#)
 - [Transaction management in AIP](#)

Certification Details and Guidelines

The duration for entire certification is **110 minutes** (1 hour 50 minutes). The certification is divided into two parts to test you on -

- **Technology Competency** - The section tests you on generic questions based on your preference or selection of technology. Such as, Java, .NET, Mainframe, or SAP. For this exam, you need to complete **20 questions** in **20 minutes**.
Note - While opting for the certification, you need to inform your preference or choice of technology for this to your CAST Representative.
- **AIP Competency** - The section tests you on advanced concepts of AIP on various areas such as AIP Console and its configurations, refining analysis configuration, reviewing of dynamic links, creating User-Defined Modules, working with Assessment Model, Transactions in Console and so on. For this exam **90 minutes** are permitted to complete **75 questions**..

Exam Scoring

The minimum passing mark for each section is **80%**. The overall certification grading will be calculated based on the passing mark of both the sections.

After the timer starts for each section, it cannot be stopped even if you leave the test page. You can however return to an active test until that timer ends. Hence, it is recommended to attempt the certification only when you can dedicate the time required for complete the certification.

How do I get started?

To register or determine which certification is for you, send an email to CAST University castu@castsoftware.com

Certification Diploma and Email Signature

Successful completion of the Certification exam is recognized with a Certification Diploma. Certified Consultants can also use the Certification logo in their email signature.
